

# Call for Events Proposals

## The 2001 International Conference on Computational Science

San Francisco, California, USA  
<http://www.ucalgary.ca/iccs>  
<http://www.hpcc.rdg.ac.uk/iccs>

May 28 – 30, 2001

### **Proposal for Organizing Technical Session and Workshop**

We invite proposals for technical sessions for technical sessions and workshops. Each technical session will have at least 6 paper presentations. Sessions with a large number of papers may be approved as workshops. The session chairs will be responsible for all aspects of their sessions; including soliciting, reviewing, and selecting the papers. The names of session chairs will appear as Associate Editors in the Conference proceedings. After the Conference, some sessions will be considered for publication in appropriate journals as Special Issues with the session proposer as the Guest Editor of the journal.

Proposals to organize technical sessions should include the following information:

- title of the technical session
- name, affiliation, mailing address and e-mail address of the proposer(s)
- description of the topic of the session (not exceeding 100 words)
- a short description on how the session will be advertised (in most cases, the session proposer(s) solicit papers from colleagues and researchers whose work is known to him/her).

The proposals will be reviewed by the Special Events Committee.

The deadline for proposal submission is December 8, 2000. Please send your proposal to [iccs2001@csres.cs.rdg.ac.uk](mailto:iccs2001@csres.cs.rdg.ac.uk).

### **Proposals for Organizing Minisymposium**

The organizing committee invites proposals for minisymposia in areas related to the conference themes. A minisymposium consists of 4 related talks of 30 minutes each (25 minutes for presentation plus 5 minutes for questions and

answers). Prospective minisymposium organizers are asked to submit a proposal consisting of:

- title of the minisymposium
- name, affiliation, mailing address, and e-mail address of minisymposium chair and co-chair
- description of the minisymposium (not exceeding 100 words)
- names of speakers, along with the following for each speaker:
  - affiliation, address, and e-mail address
  - title of their presentation

Each speaker should submit a 200-word abstract in the Springer-Verlag LNCS format. See <http://www.springer.de/comp/lncs/authors.html> for formatting information.

Minisymposium organizers should consider the following recommendations when designing their sessions.

- Speakers should be selected primarily for their current contributions to the topic area and should be as representative of researchers in the area as is practicable. In particular, we discourage minisymposia in which most of the speakers come from one organization, or are all co-authors on the papers being presented in the minisymposium.
- The first speaker should provide an overview of the topic area, put the area in current perspective, and suggest new avenues for continued research and application.
- Organizers are encouraged to include women and members of underrepresented minorities as speakers whenever appropriate.

The Special Events Committee will review contributed minisymposia and reserves the right to limit the number of minisymposia to maintain an acceptable level of parallelism in the meeting sessions.

The deadline for proposal submission is December 8, 2000. Please send your proposal to [iccs2001@csres.cs.rdg.ac.uk](mailto:iccs2001@csres.cs.rdg.ac.uk).
