

Guodong Zhang

Biographical Sketch

Guodong Zhang is a Senior Worldwide Marketing Product Manager in the Scalable Computing & Infrastructure Division of Hewlett Packard. Guodong works in a team that is responsible for the HP products and solutions portfolio for high performance computing. He focuses on HP BladeSystem, Integrity servers, cluster interconnect technology, and HPC solution offerings. Guodong has a wide breadth of experience in HPC ranging from algorithm optimization software development, and system architecture. He was a principle member of the math library team in the early 90s, and later worked as a senior technical consultant interacting with HP strategic partners and customers. Guodong holds a Ph.D. in Applied Math from Leeds University in United Kingdom, and an MBA from Southern Methodist University in Texas.
