⁶ Nanyang Technological University Singapore

1. Introduction

Welcome to the 22nd annual International Conference on Computational Science (ICCS - https://www.iccs-meeting.org/iccs2022/), to be held on 21-23 June at Brunel University London, United Kingdom. After more than two years of a pandemic that has changed so much of our world and daily lives, this edition marks our return to a partially in-person event. Those who are not yet able to join us in London have the option to participate online, as all conference sessions will be streamed.

Although the challenges of such a hybrid format are manifold, we have tried our best to keep the ICCS community as dynamic, creative and productive as always. We are proud to present the proceedings you are reading as a result of that.

Standing on the River Thames in southeast England at the head of a 50-mile (80 km) estuary down to the North Sea, London is the capital and largest city of England and the United Kingdom. With a rich history spanning back to Roman times, modern London is one of the world’s global cities, having a prominent role in areas ranging from arts and entertainment to commerce, finance and education. London is the biggest urban economy in Europe and one of the major financial centres in the world. It also features Europe’s largest concentration of higher education institutions.

ICCS 2022 is jointly organized by Brunel University London, the University of Amsterdam, NTU Singapore, and the University of Tennessee.

Brunel University London is a public research university located in the Uxbridge area of London. It was founded in 1966 and named after the Victorian engineer Isambard Kingdom Brunel, who managed to design and build a 214m long suspension bridge in Bristol back in 1831. Brunel is well-known for its excellent Engineering and Computer Science Departments, and its campus houses a dedicated conference centre (the Hamilton Centre) which has been used to host ICCS. It is also one of the few Universities to host a full-length athletics track, which has been used both for practice purposes by athletes such as Usain Bolt for the 2012 Olympics, and for graduation ceremonies.

The International Conference on Computational Science is an annual conference that brings together researchers and scientists from mathematics and computer science as basic computing disciplines, as well as researchers from various application areas who are pioneering computational methods in sciences such as physics, chemistry, life sciences, engineering, arts, and humanitarian fields, to discuss problems and solutions in the area, identify new issues, and shape future directions for research.
Since its inception in 2001, ICCS has attracted increasingly higher quality and numbers of attendees and papers, and this year – in spite of the ongoing pandemic - is not an exception, with over 300 expected participants. The proceedings series have become a primary intellectual resource for computational science researchers, defining and advancing the state-of-the-art in this field.

The theme for 2022, "The Computational Planet," highlights the role of Computational Science in tackling the current challenges of the all-important quest for sustainable development. This conference will be a unique event focusing on recent developments in scalable scientific algorithms, advanced software tools; computational grids; advanced numerical methods; and novel application areas. These innovative novel models, algorithms, and tools drive new science through efficient application in physical systems, computational and systems biology, environmental systems, finance, and others.

ICCS is well known for its excellent lineup of keynote speakers. The keynotes for 2022 are:

- Robert Axtell, George Mason University, United States of America
- Peter Coveney, University College London, United Kingdom
- Thomas Engels, Technische Universität Berlin, Germany
- Neil Ferguson, Imperial College London, United Kingdom
- Giulia Galli, The University of Chicago, United States of America
- Rebecca Wade, Heidelberg Institute for Theoretical Studies, Germany

This year we had 474 submissions (169 submissions to the main track and 305 to the thematic tracks). In the main track, 55 full papers were accepted (32%); in the thematic tracks, 120 full papers (39%). A higher acceptance rate in the thematic tracks is explained by the nature of these, where track organisers personally invite many experts in a particular field to participate in their sessions.

ICCS relies strongly on our thematic track organizers' vital contributions to attract high-quality papers in many subject areas. We would like to thank all committee members from the main and thematic tracks for their contribution to ensure a high standard for the accepted papers. We would also like to thank Springer, Elsevier, and Intellegibilis for their support. Finally, we appreciate all the local organizing committee members for their hard work to prepare for this conference.

We are proud to note that ICCS is an A-rank conference in the CORE classification.

We wish you good health in these troubled times and look forward to meeting you at the conference, whether virtually or in-person.

June 2022

The ICCS 2022 Organizers:
Derek Groen
Clélia de Mulatier
Maciej Paszynski
Valeria V. Krzhizhanovskaya
Jack J. Dongarra
Peter M.A. Sloot

2. Local Organizing Committee at Brunel University London

Chair
Derek Groen
Members
Simon Taylor
Anastasia Anagnostou
Diana Suleimenova
Xiaohui Liu
Zidong Wang
Steven Sam
Alireza Jahani
Yani Xue
Nadine Aburumman
Katie Mintram
Arindam Saha
Nura Abubakar

3. Thematic Tracks and Organizers

Advances in High-Performance Computational Earth Sciences: Applications and Frameworks – IHPCES
  Takashi Shimokawabe, Kohei Fujita, Dominik Bartuschat

Artificial Intelligence and High-Performance Computing for Advanced Simulations – AIHPC4AS
  Maciej Paszynski

Biomedical and Bioinformatics Challenges for Computer Science – BBC
  Mario Cannataro, Giuseppe Agapito, Mauro Castelli, Riccardo Dondi, Rodrigo Weber dos Santos, Italo Zoppis

Computational Collective Intelligence – CCI
  Marcin Maleszka, Ngoc Thanh Nguyen, Dosam Hwang

Computational Health – CompHealth
  Sergey Kovalchuk, Stefan Thurner, Georgiy Bobashev, Jude Hemanth, Anastasia Angelopoulou

Computational Optimization, Modelling, and Simulation – COMS
  Xin-She Yang, Leifur Leifsson, Slawomir Koziel

Computer Graphics, Image Processing and Artificial Intelligence – CGIPAI
  Andres Iglesias

Machine Learning and Data Assimilation for Dynamical Systems – MLDADS
  Rossella Arcucci

Multiscale Modelling and Simulation – MMS
  Derek Groen, Diana Suleimenova, Bartosz Bosak, Gabor Závodszky, Stefano Casarin, Ulf D. Schiller, Wouter Edeling

Quantum Computing – QCW
  Katarzyna Ryczek, Marian Bubak

Simulations of Flow and Transport: Modeling, Algorithms and Computation – SOFTMAC
  Shuyu Sun, Jingfa Li, James Liu

Smart Systems: Bringing Together Computer Vision, Sensor Networks and Machine Learning – SmartSys
4. Reviewers

Tesfamariam Mulugeta Abuhay  Carlos Bordons  Ana Cortes
Jaime Afonso Martins  Bartosz Bosak  Enrique Costa-Montenegro
Giuseppe Agapito  Giuseppe Brandi  David Coster
Shahbaz Ahmad  Lars Braubach  Carlos Cotta
Elisabete Alberdi  Marian Bubak  Helene Coullon
Luís Alexandre  Jérémy Buisson  Daan Crommelin
Nia Alexandrov  Aleksander Byrski  Attila Csikasz-Nagy
Vassil Alexandrov  Cristiano Cabrita  Javier Cuenca
Julen Alvarez-Aramberri  Xing Cai  António Cunha
Domingos Alves  Barbara Calabrese  Pawel Czarnul
Sergey Alyaev  Nurullah Calik  Lisandro D. Dalcin
Anastasia Anagnostou  Almudena Campuzano  Bhaskar Dasgupta
Anastasia Angelopoulou  Mario Cannataro  Clélia de Mulatier
Samuel Aning  Pedro Cardoso  Charlotte Debus
Hideo Aochi  Alberto Carrassi  Javier Delserfinete
Rossella Arcucci  Alfonso Carriazo  Pasquale De-Luca
Costin Badica  Jeffrey Carver  Quanling Deng
Bartosz Balis  Stefano Casarin  Vasily Desnitsky
Daniel Balouek-Thomert  Manuel Castaño-Puga  Mittal Dhruv
Krzyżtof Banasz  Mauro Castelli  Eric Dignum
Dariusz Barbucha  Nicholas Chancellor  Riccardo Dondi
João Barroso  Ehtzaz Chaudhry  Rafał Drezewski
Valeria Bartsch  Thierry Chaussalet  Hans du Buf
Dominik Bartuschat  Sibo Cheng  Vitor Duarte
Pouria Behnoudfar  Siow Ann Cheong  Richard Dwight
Jörn Behrens  Andrei Chernykh  Wouter Edeling
Adrian Bekasiewicz  Lock-Yue Chew  Nasir Eisty
Gebrail Bekdas  Su-Fong Chien  Kareem El-Safty
Mehmet Ali Belen  Marta Chinnici  Nahid Emad
Stefano Beretta  Amine Chohra  Gökhan Ertaylan
Benjamín Berkels  Neil Chue Hong  Roberto R. Expósito
Daniel Berr  Svetlana Chuprina  Fangxin Fang
